124 Exhibition St Melbourne 7

124 Exhibition St, Melbourne

New Fitout

124 Exhibition St is a striking fusion of the contemporary and the historic merges in the recent fitout of an aged building. The innovative vision manifests through the suspension of panel lights at random heights above the grid ceiling, creating an aesthetically pleasing display. Adding to the allure, all lights are Dali-controlled, enabling individual dimming. This clever implementation results in a captivating, uneven pattern of light that dances across the grid, introducing a modern dynamic to the space. The careful balance between innovation and preservation showcases a thoughtful approach to design, seamlessly breathing new life into the old building while honouring its inherent charm.
