North Regional Football Facility

WESTERN_UNITED_TARNEIT_LMP04919

LED Lighting Development

The North Regional Football Facility, situated in Tarneit, Victoria, is the home of Western United Football Club, which hosted its first match at the venue in March 2024.

The main training pitch features a professional-grade surface and can accommodate 5,000 spectators, including an 800-seat grandstand. The facility also includes a two-storey pavilion with training and gym amenities, function and media spaces, changing rooms, staff facilities, kiosks, public restrooms, and a first aid room. Onsite parking is available.

Decrolux provided comprehensive lighting design and supplied all interior and exterior lighting. This included downlights, panel lights, ceiling lights, and outdoor lighting for the car park and surrounding areas, such as the 8m Tapered Octagonal Pole, Carrington Heritage Light Pole, Kingston Street Light, and Fernhurst Post Top.
