# Tarneit Mixed Use Development

New Development

The Tarneit Mixed-Use Development, located in Tarneit, Victoria, features a variety of tenants, including a fuel station, fast food outlets, specialty stores & childcare.

With a carefully curated mix of hospitality, retail, and childcare across 10 tenancies, this shopping precinct is designed to provide essential services to the local community. Strategically situated on Sayers Road, the development capitalises on the high volume of daily traffic and the rapidly growing population in Melbourne's western suburbs.

Decrolux & Horizon Poles played a key role in the project, supplying 4.5-metre Heavy-Duty Round Pipe Poles throughout the carpark. Some of these poles were fitted with double outreach arms to accommodate two lights, including the 100W Kingston Streetlight, while other poles had a single light mounted directly on the pole.
