

# ALPHA-S 13W

## Adjustable Tracklight

**Classic Series**

Proven. Quality. Customisable

Track Lighting is popular in applications such as museums, art galleries, restaurants and retail spaces because of its unique flexibility in positioning the direction of the light, and the ability to add or remove fittings to achieve the desired luminance levels. With precise beam control which ranges from 12° to 40°, the ALPHA Track Light serves to focus the viewer's attention onto a piece of art work or display.
