Decrolux Panel Light

Surface Mount Kit

The Decrolux Surface Mount Kit is designed for quick and clean installation of panel lights in spaces where recessed mounting isn't possible, or grid ceiling isn't used. Ideal for solid ceilings, limited cavity depth, or areas with obstructions like ducting or conduits.

The low-profile frame securely houses the panel light and fixes neatly to the ceiling. Simply install the base, insert your Decrolux Panel Light, and attach the side covers. The result is a sleek, professional finish that projects just 50mm from the ceiling surface.
