PERRI 6W

Mini Downlight

The PERRI 6W Downlight is the smallest downlight in the range. Its petite size, soft curved edge design, and controlled 30° beam angle provide a subtle yet focused spread. Available in black or white housing and equipped with phase-cut dimming for ultimate control, it is often used in hotel applications and spaces with low ceiling cavities. Its deep recessed baffle LED provides complete glare control and visual comfort.
