

RHYNE/LENNOX Floodlight

Anti-Glare Shield

Classic Series

Proven. Quality. Customisable

The RHYNE/LENNOX Floodlight Anti-Glare Shield is an accessory designed to reduce light pollution and disturbance in sensitive environments. It is compatible with the RHYNE/LENNOX Floodlight range and can be retrofitted to existing applications. The shield can be used on signage, flagpoles, and residential areas to limit the amount of scattered and emitted light beyond the intended area of illumination.

Available to suit the complete RHYNE/LENNOX Floodlight Range. Can be retrofitted to existing applications.
