

Aluminium Reflector

to suit 120W-200W VENUS Highbay

Classic Series

Proven. Quality. Customisable

The Aluminium Reflector is a great option to control the light output of the VENUS Highbay fitting, as it can reduce glare by controlling the light to a 70-degree beam angle. Made of durable and lightweight aluminium, it is available in a silver or black finish. With its practical and stylish design, the Aluminium Reflector is a great addition to any project that requires efficient and effective lighting.

Also creates a much softer look, to use a high output light in a commercial, or retail space.
