WINSLOW 1W

Surface Mount Wall Light with USB Port

The WINSLOW Wall Light is a sleek, surface mounted wall light, ideal for modern hotels and accommodation buildings. Designed with a USB port to cater for the increasing use of technology, the ability to charge devices from the bedside adds another level of functionality. The light is activated when the head is pulled out, and automatically turns off when pushed back into the holder, through a clever sensor switch. Available in black or white, the WINSLOW blends seamlessly with modern interiors.
